ABSTRACT

This report is based on a questionnaire survey directed in spring and fall 1977 to all state foreign language supervisors. In those cases where state totals were not available, questionnaires were sent directly to various school districts. An analysis of the compiled figures showed that in fall 1976, the public secondary schools (PSS) in the 7-12 range reported a foreign language enrollment of over 3.78 million, comprising 17.9 % of the total PSS school enrollment of over 21 million students. Two years earlier, in 1974, 4.03 million foreign language enrollments were reported from the PSS population of nearly 21 million students. The report consists of an introductory summary of results, summary tables and individual tables by region and state, with comparative data from surveys undertaken in 1970 and 1974. (Author)

Survey of Foreign Language Enrollments in Public Secondary Schools, Fall 1976

American Council on the Teaching of Foreign Languages
2 Park Avenue, New York, New York 10016

U.S. Office of Education, Division of International Education,
Grant No. G00-77-00391

This report is based on a questionnaire Survey directed in Spring and Fall 1977 to all state foreign language supervisors. In those cases where state totals were not available, questionnaires were sent directly to various school districts.

An analysis of the compiled figures showed that in Fall 1976, the public secondary schools (PSS) in the 7-12 range reported a foreign language enrollment of over 3.78 million, comprising 17.9 percent of the total PPS enrollment of over 21 million students. Two years earlier, in 1974, 4.03 million foreign language enrollments were reported from the PSS population of nearly 21 million students.

The report consists of an introductory summary of results, summary tables and individual tables by region and state, with comparative data from surveys undertaken in 1970 and 1974.

Foreign Language Offerings and Enrollments
in Public Secondary Schools, Fall 1976

This study of foreign language enrollments in public secondary schools is the twelfth in a series. Since 1958 it has been prepared by the Modern Language Association with the exception of this survey which has been conducted by the American Council on the Teaching of Foreign Languages. This report shows the impact on high school foreign language enrollment of the recent trend among many colleges and universities to drop prerequisite requirements in foreign languages. The present study focuses primarily on enrollments in Fall 1976, but it also presents comparative data from earlier reports, particularly from 1970 and 1974, the dates of the most recent studies.

In Fall 1976, the public secondary schools (PSS) reported for grades 7-12 a foreign language (FL) enrollment of over 3.78 million, which represents 17.9 percent of the total PSS enrollment of over 2.1 million students. Past studies reveal that in 1968, 4.75 million FL enrollments were reported from the PSS population of 18.4 million students; and in 1974, over 4.03 million FL enrollments were reported from a PSS population of 21.0 million students. Although the PSS population increased slightly from 1974 to 1976, the FL enrollment decreased by one-quarter million. During the two year period, there was a drop in total enrollment in foreign languages as well as a drop in the percentage of the total school population studying a foreign language.

Distribution of the Foreign Language Enrollment

In Fall 1976, the five leading modern foreign languages (MFLs)--Spanish, French, German, Italian, and Russian--accounted for 95.7 percent of the total language enrollments in grades 7-12; Latin for 4.2 percent; and "other" languages, about two dozen total, for one-half of one percent.

Nationally, FL enrollment as a percentage of PSS populations in grades 7-12 fell from 24.8 in 1970 to 19.2 in 1974 to 17.9 in 1976. This downward trend began in 1968 when the FL enrollment of 27.4 in 1965 decreased to 27.1.

Of the high school students (grades 9-12) of MFLs, over half (56.7 percent) are studying Spanish. French is in second place in 1976, with 29.4 percent of the total MFL enrollment, and German is third with 10.7 percent, which experienced the largest decrease in enrollment, over 50,000 enrollments, since 1974.

Latin enrollment continued to decrease in 1976, comprising less than one percent of the total FL enrollments. From 1974 to 1976, Latin lost over 25,000 student enrollments. Italian and Russian enrolled approximately 57,000 and 13,000, respectively. Italian was the only widely taught language to show an increase in total enrollment between 1974 and 1976.

Two dozen "other" languages are taught in secondary schools, all with limited enrollments. The total enrollment in "other" languages has increased steadily since 1970 from 17,000 to 25,000 in 1974 to 27,599 in 1976. Of the two dozen "other" languages, enrollments in African languages have almost tripled since 1974, Modern Greek has doubled, Japanese has increased 20 percent, and Portuguese has increased slightly. The remaining "other" foreign languages of 1976 indicate a slight decrease in enrollment.

The summary table below constitutes a capsule history of foreign language study in the 9-12 grade span of U.S. public high schools over the past 86 years. In 1890, one high school student in three was enrolled in Latin, and one in six was studying either French or German. By the turn of the century, the proportion of high school students enrolled in Latin had risen to half, and in French or German, to a fifth. In 1910, Spanish appeared in the high school curriculum, with an enrollment of less than one percent of the population. Following World War I, there was a dramatic shift in the balance among the languages. German, formerly the leading modern foreign language, drastically declined in enrollment, and French became the leader. In 1922, French enrolled 15.5 percent of the high school population, Spanish followed with 11.3 and German trailed behind with less than one percent.

The 1930's and 1940's saw a general decline in foreign language study. By 1948, only one-fifth of the high school population was enrolled in any foreign language. Spanish had emerged as the leading modern foreign language, with 8.2 percent of the high school population; French, which had not yet recovered from the dramatic drop it suffered in World War II, had less than 5 percent.

Beginning in 1958, the picture in modern foreign languages brightened as the enrollments steadily increased until 1968. Since 1968, foreign language enrollments have continued to decrease, while PSS enrollments have increased. The 1976 figures indicate a decline in the total foreign language enrollment. Italian was the only language to show an increase in enrollment, but this only represents .3 percent of the PSS enrollment. Spanish showed the least decline, less than 3 percent, followed by German with a decrease of 11 percent. Russian suffered the greatest loss of 24 percent of the already small number of PSS enrollments. Latin and French continued their downward trends with a loss of 14 percent in each language. The percentage of high school students enrolled in all foreign languages decreased from 19.2 in 1974 to 17.9 in 1976.

Special Explanations

Tables of data for the individual languages are organized as follows: the numerals 3 through 8 designate the languages--Spanish, French, German, Russian, Italian, and Latin, in that order--and the letters A through G designate the seven tables into which the data for each language are organized. The pattern is consistent, so that comparisons between languages are easily made. For example, Table 3-A shows Spanish enrollments in grades 7-12 for Fall 1976, by state, with breakdown by course; Table 4-A gives the corresponding information for French, Table 5-A for German, and so forth. Table 9-A is devoted to enrollments in languages other than the six with the largest enrollments.

The B Tables (2-B, 3-B...8-B) for each language show a comparison in enrollments between 1970 and 1974 and between 1974 and 1976 for the secondary grades 7-12, and give the percent of change in the enrollment over each of the periods. An additional column gives the percent of change in the total PSS student enrollment over the same period of time, for comparison with the language enrollment changes. This high school population increase was obtained from enrollment figures published by the U.S. Office of Education. The C Tables (2-C, 3-C...8-C) provide the same information for grades 7-8, the D Tables for grades 9-12. Tables designated E provide state-by-state comparisons with PSS enrollments for 1976, F Tables give a breakdown for grades 7-8, and G Tables for grades 9-12.

Data Compilation

For this study, the foreign language supervisors of the following states returned complete statistical data for their enrollments: Alabama, Arkansas, California, Florida, Hawaii (1977 data), Idaho, Iowa, Kansas, Kentucky, Massachusetts (1975 data), Maryland, Minnesota (1977 data), Missouri, Montana, Nebraska, New Hampshire, New York, New Jersey, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania (1977 data), South Carolina, Texas, Utah, Vermont (1975 data), Virginia, West Virginia, Wisconsin, and Wyoming.

From the following list of states, the state supervisors of foreign language in secondary schools returned partial information from which estimates of total enrollment were computed: Connecticut, Delaware, District of Columbia, Illinois, Louisiana, Maine, Mississippi, South Dakota, and Washington. Indiana is complete for grades 9-12 only--no information is available for grades 7-8. The states of California, Massachusetts, Minnesota, Missouri, Nebraska, North Dakota, South Dakota, Vermont, West Virginia, and Wyoming did not have a breakdown of enrollment statistics for grades 7-8 separately but provided aggregate data for grades 7-12. In preparing the tables involving these states, the distribution of the enrollments between the two categories 7-8 and 9-12 was tabulated on the D Tables with the 9-12 enrollments. When the state department could not provide the statistical data requested, random samples of school districts were conducted in the following states: Alaska, Arizona, Colorado, Georgia, Michigan, Nevada, New Mexico, Oregon, Rhode Island, and Tennessee.

All of this information has been footnoted on Table 2-A, the statistical chart which indicates the percent of PSS students enrolled in a foreign language. Throughout the survey, various symbols, i.e., #, @, +, 0, 00, appear which signify to the reader that he should refer to the footnotes for Table 2-A for an explanation. Whenever the Roman Numeral appears at the conclusion of Tables B-D, this notation indicates to the reader that this reference applies to 1970 data. A lower case letter represents footnotes for 1974 data. All of these notations are explained at the conclusion of individual Tables B-D.

A similar survey evaluating statistical data for 1978 is now in progress. ACTFL will continue to report this data every other year in order to provide educators with information about the future trends in foreign language study. Through continued research and a thorough investigation of foreign language study, efforts can be made to reverse the trend of the seventies.

1976	13,952,058	3,023,493	21.7	1,717,023	12.3	888,351	6.4	352,690	2.5	11,252	.1	45,587	.3	150,470	1.1

1. All foreign language enrollments from 1890 through 1948 are estimated from percents of the languages in the total high school enrollments given by William R. Parker, The National Interest and Foreign Languages, U.S. National Commission for the United Nations Educational, Scientific, and Cultural Organization, 1957, pp. 52-53
2. The totals of the modern foreign languages (columns 5, 7, 9, 13) do not equal the MFL enrollment totals in column 3, since the column 3 figures include a small number of enrollments for "Other Languages." (See Table 9-A for a summary of "Other Languages" enrollments, 1974)

1. The totals of the modern language figures and the "Other MFL's" do not equal the total Modern Foreign Language Enrollment due to the total number of "languages unspecified" reported by different states.

FOOTNOTES FOR TABLE 2-A

- A. Data estimated by reporting state.
 - B. Revised from previously published data.
 - C. Figures are for 1974.
1. No data available from state department of education; school district sample conducted and projections calculated.
 2. No data available from state department of education; telephone sample conducted and projections calculated for state.
 3. Partial data available from state department of education from which projections were calculated for state.
 4. Figures are for 77-78.
 5. No information available for grades 7-8.
 6. Figures are for 75-76; no information available for 7-8.
 7. Figures are for 1975-76.
 8. Total includes 9,597 junior high, no language breakdown available and 313 other languages.
 9. Partial data available from state department of education from which projections were calculated for state; information not available for grades 7-8.
 10. Total includes 4,257 enrollments, language unspecified.
 11. Includes 76 enrollments, language unspecified.
 12. Figures are estimates prepared by state department of education.
 13. USA totals include 3,326 enrollments for which the course level is unidentified.
 14. USA totals include 1,754 enrollments for which the course level is unidentified.
 15. USA totals include 583 enrollments for which the course level is unidentified.
 16. USA totals include 57 enrollments for which the course level is unidentified.
 17. Figure includes 4,891 enrollments language unspecified.
- No breakdown for grades 7-8.
 - # No information by grade level, only by course level.
 - + Ratios used to obtain information
 - @ Figure does not include junior high enrollment of 9,597.
 - X Figure represents estimate based on average of region.
 - No breakdown by level or by course.

**TOTAL FL ENROLLMENTS (WITH BREAKDOWN INTO MODERN FOREIGN
LANGUAGES AND CLASSICAL LANGUAGES) COMPARED WITH PSS ENROLLMENT,

FOOTNOTES FOR TABLE 2-C

- I. 7-8 enrollments are available only according to level and are therefore included in 9-12, Course I
- II. Figure compiled without Florida, Georgia totals
- III. Figure compiled for region without California totals
- IV. Figure compiled for region without California, Florida, Georgia, and Texas totals
 - a. 1972 data
 - b. 1973 data
 - c. No information for grades 7-8
 - d. Information represents estimates based on average of region
 - e. Information not available by grade level
